Step-by-step instructions

Pair the blinds with ease with the app's guided instructions

Blind position and battery level

Add feedback capabilities and percentage position control via Bluetooth

Create schedules to any blind position

Create schedules using the percentage position to control light and privacy of your home

Blue Link will add feedback capabilities and percentage position control via Bluetooth when connected to a supported Neo Motor. Using the app, you can locally control and create schedules for each blind without connecting to a router or Wi-Fi.

About the Blue Link

- Direct local phone control
- Signal strength indicator
- Battery level indicator
- Blinds position indicator
- Control your blinds individually
- Swipe control to set the blind to any position between 0 to 100%
- Set schedules to automate your blinds
- Over-the-air updates

Technical Support

Online documentation and technical support via phone or email

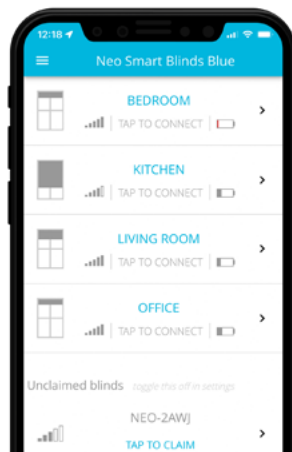

Neo Smart Blinds Blue app

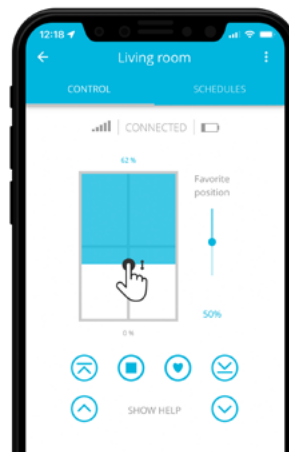

The app is available on Google Play and on the App Store.

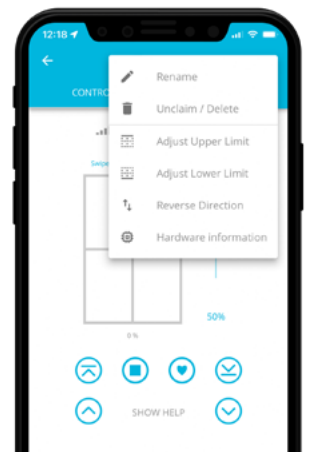

Compatible with Neo Smart Blinds motors with built-in Bluetooth or external Blue Link (Bluetooth dongle connected).

Blind position, signal strength and battery level for each blind paired

Swipe to set the blind to any desired position

Adjust limits, reverse direction and access to OTA update for your blinds
