Blue Link add-on connected to motor

About the Blue Link

Blue Link provides **real-time feedback and precise position control via Bluetooth**, whether built into the motor or connected as an add-on to a compatible Neo Smart Blinds model. Using the app, you can **locally control and schedule each blind without the need for a router or Wi-Fi**.

Features

- Direct local control via smartphone over Bluetooth
- Signal strength indicator
- Battery level indicator
- Real-time blind position feedback
- Individual blind control
- Swipe to set blind position from 0% to 100%
- Limit settings and reverse direction supported via app
- Create schedules to automate daily operation
- Over-the-air firmware updates

Need help?

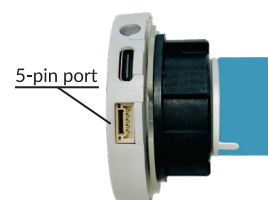

Reach out to our technical support via phone or email for assistance.

Motor Requirements

The Blue Link is a Bluetooth solution designed exclusively for **Neo Smart Blinds motors**, available as a **built-in option** or as an **add-on for motors with the 5-pin port**.

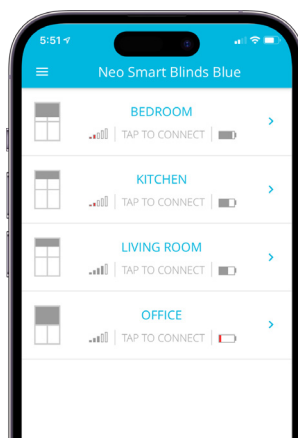

Motor Models

- Blue Link built-in: TM-BRB, CM-BRE
- Blue Link add-on compatible: TM-RB, TM-WB, TM-RT, TM-RA
- Not Compatible: TM-WRT, CM-WRT

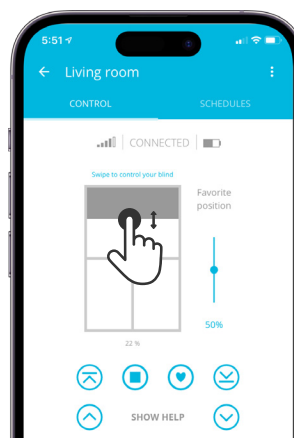

Neo Smart Blinds Blue

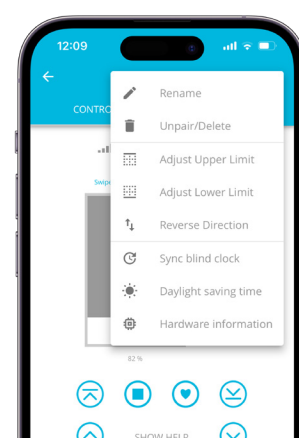

Available on Google Play and the App Store.
